EDUCATION

Year	Degree	Institute	GPA
2026-Present	M.Sc. Information and Communication Engineering	Beijing Institute of Technology, Beijing, China	4.0/4.0
2022-2026	B.Sc. Data Science and Big Data Technology	University of Electronic Science and Technology of China, Chengdu, China	3.74/4.0
2022-2026	B.Ec. Finance	University of Electronic Science and Technology of China, Chengdu, China	3.74/4.0

PROGRAM

- VocabMate: English Vocabulary Learning iOS App Based on Qwen LLM** Jan.18 2026 - Jan.27 2026
Team Leader NTU, Singapore
 - Architected the layered structure of the iOS app, including Models, Services, Views and Theme modules
 - Developed core business modules: built the vocabulary management, AI chat, and quiz practice views using SwiftUI
 - Integrated backend services: implemented the Qwen AI API service for intelligent interactions

PUBLICATIONS

- **Ziang Niu**, Author 2, Author 3. (2023). *Title of your amazing research paper*. Name of the Journal or Conference, Volume(Issue), Page-Page. [DOI/Link]
- Author 1, **Ziang Niu**, Author 3. (2022). *Another great paper title*. In Proceedings of the XYZ Conference. [PDF]

PROJECTS

- Empirical Study on Stock Index Prediction Based on SCA-LSTM** Sep. 2025 - May. 2026
Graduation Project UESTC, China
 - Constructed a multi-dimensional feature system with price-volume, macroeconomic and technical indicators
 - Extracted key features using the Top-k intersection of random forest dual importance
 - Optimized [Sine Cosine Algorithm (SCA)]’s population iteration and parameter update strategy by introducing chaotic mapping and nonlinear decreasing equations
 - Optimized LSTM hyperparameters with SCA (Shanghai Composite Index as object) for closing price prediction
 - Conducted horizontal/vertical verification with ARIMA, Random Forest, XGBoost and basic LSTM.
- HR Management Database System Based on Huawei GaussDB** Apr. 2024 - May. 2024
Individual Project UESTC, China
 - Independently designed and implemented a multi-role human resource management database system
 - Built core architecture with Huawei GaussDB and developed data interaction interfaces via Python
 - Completed table structure design and wrote full-process SQL statements

HONORS & AWARDS

- **Outstanding Graduate** UESTC, Jun. 2026
- **Outstanding League Cadre** UESTC, May. 2024 & May. 2025
- **Xiaomi Scholarship** UESTC, Nov. 2025
- **First Prize, Outstanding Student Scholarship** UESTC, Nov. 2024
- **Second Prize, Outstanding Student Scholarship** UESTC, Nov. 2023 & Nov. 2025

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, HTML
- **Project Tools:** PyCharm, Visual Studio Code, Git & GitHub, Overleaf, Typora
- **AI Tools:** Gemini, ChatGPT, Antigravity
